The event took place during that terrific southeaster one black night three years ago, when the large barn of George C. Thrall was blown down and other damage done. This citizen at the request of his wife went to the attic of his North Main street domicile to close a window that had been left open. While in the act the chimney was own over, the clattering of bricks on the slate roof a few inches over his head making a thunderous and unearthly noise. The lightning was almost incessant. At once, thinking the end of all things earthly at hand, on his knees he sought forgiveness; he prayed as he nev er prayed before. Presumably Providence and prosperity have suriled upon him since because of his devotions. Inci-dentally a flash light moving picture of the blanched face pleading for mercy contraction in the heart, would have been instructive and illuminating, but unforfunately the event antedated the develnent of cinematography. The film "An Attic Repentance," would have at tracted widespread interest and probably would have been allowed Sunday night presentation -- Butland News.

There is only one way to cure catarrhal deafness, and that is by a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Tustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect bearing, and when it is entirely closed Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever.
